

Brand new generation frame replaces BFe275 and BFeMAX

The all new **BFe** is a crazy fast, super tough, hardcore hardtail. It's a do-it-all fun machine you can run as either a full 29er for maximum speed, or a lively and grin inducing mullet setup.

If you're looking for the fastest descending hardtail possible, then you're in the right place. With 29 inch wheels, the **BFe** screams '*Come and have a go*'. Big mountains, rocky chunk and steamrolling down just about anything, this is the bike you need to embarrass your full suspension riding mates.

The **BFe** has a trick up it's sleeve, featuring our ***Double Decker Dropout*** allowing you to fit a 650b rear wheel and maintain perfect longshot geometry while bringing the playful, fun and exciting handling of a mullet bike. If you like steep and committed corners, and a perfectly poised bike for flying off kickers and drops, a mullet **BFe** will suit you perfectly.

Its our most versatile hardtail. Fork travel from 130mm to 160mm, big tyre clearances and legendary toughness thanks to it's [Reynolds 853](#) down tube, and Cotic FM custom butted tubeset throughout the rest of the frame for the classic Cotic ride feel.

BFe turns the fun factor up to 11 and will handle absolutely any thing you can throw at it, coming out laughing.
